# Furloughs Preliminary Report

LEOFF Plan 2 Retirement Board

April 28, 2010

## Issue

Members who take voluntary or involuntary unpaid leave as a result of the current economic condition, may have their retirement benefit adversely affected if it occurs during their final average salary (FAS) period.

## Background

As of June 2009, 21 states have implemented or will soon be forced to implement furloughs.

Most states' pension benefits could be adversely impacted.

Legal challenges to furloughs.

# Legislation

■ SB 6157 – Furloughs

■ ESSB 6503 – Closing of State Agencies

## SB 6157 – Passed 2009

- PERS Plans 1, 2 & 3 only
- DRS to implement
- Must be a direct result of an effort by the employer to reduce costs during the 2009-11 fiscal biennium only

## ESSB 6503 – Passed 2010

- Includes all other retirement plans
- Applies to state agencies and institutions only
- Must be a direct result of an effort by the employer to reduce costs during the 2009-11 fiscal biennium only

## Summary

Creates the potential for a reduction in a member's pension benefit calculation if the furlough occurs during the FAS period

Creates inconsistencies between members with different employers.

# **Policy Options**

- Propose legislation to ensure LEOFF Plan 2 members do not have their pensions reduced because of furloughs
- Coordinate with Select Committee on Pension Policy

## 3. Members Impacted

As of June 30, 2008 there were 16,626 active members and 1134 retirees as reported in the Office of the State Actuary's 2008 Actuarial Valuation Report. Furloughs are a short-term option for solving budget shortfalls and should impact only those active members who plan to retire within the next five-seven years, and are furloughed during their FAS period.

#### 4. Current Situation

A member's benefit is calculated using the formula; 2 percent, times FAS times years of service (YOS). If a member is required to take furlough days during their FAS period, which lowers their reported salary, it lowers their FAS, and thus lowers their benefit.

### **5. Background Information and Policy Issues**

In today's economic environment many local and state governments are facing revenue shortfalls. There may be some public service programs discontinued or restricted and there may be some employee layoffs as a result of budget restrictions. In order to balance budgets, many state and local governments, as an alternative to layoffs, are considering furloughs as a way to decrease costs. A furlough is a leave of absence without pay. One advantage of using furloughs versus layoffs is employees are not terminated, yet there is a cost savings as the time off is without pay. Also, when the economy recovers there is no need to rehire and retrain the workforce. However, there are some potential negative impacts with the use of furloughs. One impact it could have is on a member's pension calculation if the furlough were to occur during the member's final average salary (FAS) period.

During the 2009 Legislative Session, the Legislature recognized the potential impacts to a members pension benefit through the use of furloughs to help balance budgets. As a result, the Legislature passed SB 6157 (see Appendix A to see a complete copy of the bill) which allowed the pension benefit calculation to be adjusted for furloughs if the furlough occurred during the member's FAS period. While this did address the problem, it only included the Public Employees' Retirement System (PERS) pension system. Members of the other retirement systems, including LEOFF Plan 2, would not be granted the same benefit calculation adjustment. This difference in policy led the Board to send a letter to the Select Committee on Pension Policy (SCPP) to jointly sponsor legislation similar to SB 6157.

The Legislature did pass a bill (as of the date of this report not signed by the Governor) in the 2010 Legislative Session, ESSB 6503, which addressed the potential impacts to a member's pension benefit through the use of furloughs for all of the retirement systems. However, those changes only included those members employed by a state agency or institution, which basically excludes most of the LEOFF Plan 2 membership.

Many other states are using furloughs to help balance budgets. For example, in an article by Pauline Vu of Stateline.org, by the end of June 2009 twenty-one states had implemented or would be implementing furloughs. The number of days ranges from as few as two days, to as many as thirty days. Many of the states that are employing furloughs do not apply them to public safety employees such as police officers, fire fighters and correctional officers.

The use of furloughs has resulted in legal challenges across the country. In Prince George County, Maryland, a federal judge ruled against the county's furlough program stating it violated the contract clause of the United States Constitution, which bars states from passing laws impairing the obligation of contracts. Many employees in other states are currently working under expired contracts so they may not be covered under the contracts clause of either the United States Constitution or their state constitution.

Furloughs would have an adverse impact on pensions in most states. Like Washington, if the furlough occurs during the FAS period, it would lower the FAS, and thus lower the pension

benefit for the employee. Delaware has introduced legislation that would prevent furloughs from impacting pension calculations for police and firefighter pensions.

Another point to consider is an employee's status. Looking at the U.S. Department of Labor regulations issued in 2007, an exempt salaried employee is entitled to their full salary in any week in which the employee does any work at all, regardless of the number of hours worked so the impact of furloughs on these employees is unclear.

#### **Policy Issues:**

One policy issue is to determine whether or not to change the laws to ensure that a member who either voluntarily or involuntarily takes unpaid leave as a result of the current economic condition does not have their retirement benefit adversely affected if it occurs during their FAS period. It also becomes an equity issue since PERS members would be given relief in this situation, but LEOFF Plan 2 members would not be.

#### **Policy Options:**

#### **Option 1 – Introduce Legislation Including all Employers**

Under this option the Board would propose legislation to ensure that LEOFF Plan 2 members do not have their pensions reduced because of a furlough.

#### **Option 2 – Coordinate with Select Committee on Pension Policy (SCPP)**

Under this option the Board would coordinate potential legislation with the SCPP.

Compensation earnable earned for less than seventy hours in any calendar month shall constitute one-quarter service credit month of service. Time spent in standby status, whether compensated or not, is not service.

Any fraction of a year of service shall be taken into account in the computation of such retirement allowance or benefits.

  - (d) Service not to exceed six consecutive months of probationary service, rendered after October 1, 1947, and before April 1, 1949, and prior to becoming a member, in the case of any member, upon payment in full by such member of five percent of such member's salary during said period of probationary service, except that the amount of the employer's contribution shall be calculated by the director based on the first month's compensation earnable as a member.

- (b) "Average final compensation" for plan 2 and plan 3 members, means the member's average compensation earnable of the highest consecutive sixty months of service credit months prior to such member's retirement, termination, or death. - (c) In calculating average final compensation under this subsection for a member of plan 1, 2, or 3, the department of retirement systems shall include any compensation forgone by the member during the 2009-2011 fiscal biennium as a result of reduced work hours, voluntary leave without pay, or temporary furloughs if the reduced compensation is an integral part of the employer's expenditure reduction efforts, as certified by the employer.

#### WHAT THE READER SHOULD KNOW

The Office of the State Actuary ("we") prepared this fiscal note based on our understanding of the bill as of the date shown above. We intend this fiscal note to be used by the Legislature during the 2009 Legislative Session only.

We advise readers of this fiscal note to seek professional guidance as to its content and interpretation, and not to rely upon this communication without such guidance. Please read the analysis shown in this fiscal note as a whole. Distribution of, or reliance on, only parts of this fiscal note could result in its misuse, and may mislead others.

#### SUMMARY OF RESULTS

This bill modifies the definition of Average Final Compensation (AFC) for the Public Employees' Retirement System (PERS) to include the salary forgone by members due to taking time off without pay during the 2009-2011 Biennium. This modification only applies to time off taken as an integral part of an employer's effort to reduce expenditures.

Please see the remainder of this fiscal note for additional detail including how the cost could increase above the amounts listed above.

#### WHAT IS THE PROPOSED CHANGE?

#### **Summary Of Benefit Improvement**

This bill impacts the PERS Plans 1, 2, and 3 by modifying the definition of AFC. The new definition of AFC for purposes of calculating a member's retirement benefit includes salary forgone by the member during the 2009-2011 Biennium due to time off without pay. However, this modification to the AFC only applies to time off without pay taken as an integral part of the employer's efforts to reduce expenses.

Effective Date: 90 days after session.

#### What Is The Current Situation?

AFC for PERS Plan 1 members is the annual average of the greatest salary earned during a two year period where the members earned service credit in each month of that period. For PERS Plan 2/3 members, AFC is the annual average of the greatest salary earned during a five year period where the members earned service credit in each month of that period.

PERS members who take time off without pay may be able to restore the missing service and/or compensation upon return to employment, depending on the member's plan and the reason for the time off. For example, all members can generally restore service and salary for time off to serve in the armed forces. However, only Plan 2 or Plan 3 members can restore service for other voluntary time off without pay.

#### Who Is Impacted And How?

We estimate this bill could affect all 158,022 active members of PERS through improved benefits. With the absence of a statewide furlough policy, we believe at least 19,000 members will be affected by taking ten furlough days in each year of the upcoming biennium. We used this as the assumption for our pricing.

We believe a reasonable estimate of a statewide furlough policy would be anywhere from 39,506 to 158,022 members taking ten furlough days in each year of the upcoming biennium. We priced these two scenarios in the How The Results Change When The Assumptions Change section (AKA sensitivity analysis).

#### WHY THIS BILL HAS A COST AND WHO PAYS FOR IT

#### Why This Bill Has A Cost

This bill changes the law to increase the AFC, and retirement benefit, of anyone who takes cost-saving furloughs over the next two years. Any increase in ultimate retirement benefits due to this law change would be considered a cost to the pension system. The AFC is used in the retirement benefit calculation through termination, retirement, disability, and death.

#### Who Will Pay For These Costs?

These costs will be funded consistent with the normal pension funding policy of PERS. All employers of PERS, School Employees' Retirement System (SERS), and Public Safety Employees' Retirement System (PSERS) members will pay a larger Unfunded Actuarial Accrued Liability (UAAL) contribution rate due to the increase in costs from PERS Plan 1 members. Members of PERS Plan 2 and employers of members in PERS Plans 2/3 will share equally in contribution rate increases due to the costs from PERS Plans 2/3 members.

#### HOW WE VALUED THESE COSTS

#### **Assumptions We Made**

For the pricing of the fiscal note we assumed:

 Twelve percent of the members in PERS (both State and local) would take ten furlough days each of the next two years, absent a statewide furlough policy.

For the low-cost estimate we assumed:

• Twenty-five percent of the members in PERS (both State and local) would take ten furlough days each of the next two years, based upon a statewide furlough policy.

For the high-cost estimate we assumed:

• Every member in PERS (both State and local) would take ten furlough days each of the next two years, based upon a statewide furlough policy.

Otherwise, we developed these costs using the same assumptions as disclosed in the June 30, 2007, Actuarial Valuation Report (AVR).

#### **How We Applied These Assumptions**

We determined the cost of this bill when both one-quarter (low-cost estimate) and the full population (high-cost estimate) took ten furlough days for the next two years. We decided that was a reasonable range for this bill if a furlough policy were announced.

However, since a statewide furlough policy has not been announced, we determined that 12 percent of the PERS population would need to take ten furlough days in order to impact supplemental contribution rates in the 2009-2011 Biennium. We concluded that 12 percent of the population taking furloughs is likely based on King County (3.5 percent of PERS) already announcing a 10-day furlough policy.

The method we used for calculating the cost of our scenarios is outlined below:

We created a new "base" which reflects the future benefits expected to be earned based on average final compensation excluding missed furlough pay.

To do this we first altered the projected salary stream of the affected members. Each affected member's salary would decrease by 2/52 in the first year to reflect two work weeks of time off. We then increased every member's salary by 4.25 percent in the second year to reflect assumed general salary growth. We then increased every member's salary by 8.42 percent in the third year to reflect assumed general salary growth and the return to a full annual salary. Please see the table below for an example of the salary streams under this pricing.

Salary Example					
Year 1 Year 2 Year 3					
With Furlough	\$48,077	\$50,120	\$54,340		
Without Furlough	\$50,000	\$52,125	\$54,340		

We then measured the increase in liability between the "base" and the "pricing" – where the "pricing" is consistent with our AVR. The increase in liability emerges due to a higher AFC in the calculation of retirement benefits. We discounted the liability increase by two years to produce a liability change consistent with the liabilities as of the valuation date.

Otherwise, we developed these costs using the same methods as disclosed in the AVR.

#### **Special Data Needed**

We relied on information contained in the 2009 King County budget that requires ten county-wide furlough days in the 2009 budget year. King County represents approximately 3.5 percent of the total PERS population.

We developed these costs using the same assets and data as disclosed in the AVR.

#### ACTUARIAL RESULTS

This bill will impact the actuarial funding by increasing the present value of future benefits payable under the system as shown below.

### **How Contribution Rates Changed**

The rounded increase in the required actuarial contribution rate results in the supplemental contribution rate shown below that applies in the current biennium. However, we will use the un-rounded rate increase to measure the budget changes in future biennia.

Note: Totals may not agree due to rounding.

The analysis of this bill does not consider any other proposed changes to the system. The combined effect of several changes to the system could exceed the sum of each proposed change considered individually.

As with the costs developed in the actuarial valuation, the emerging costs of the system will vary from those presented in the AVR or this fiscal note to the extent that actual experience differs from the actuarial assumptions. If the State adopts a furlough policy in the 2009-2011 Biennium, the State Actuary may calculate an additional supplemental contribution rate increase for this bill.

#### HOW THE RESULTS CHANGE WHEN THE ASSUMPTIONS CHANGE

The cost of this bill could increase if the State adopts a furlough policy and/or actual experience exceeds the amount assumed in this pricing. The tables below show the impacts of this proposal when we change the assumed percentage of members who will take ten furlough days in the next two years.

- Low Estimate 25 percent assumption
- **High Estimate** 100 percent assumption

State Actuary

#### GLOSSARY OF ACTUARIAL TERMS

**Actuarial Accrued Liability:** Computed differently under different funding methods, the actuarial accrued liability generally represents the portion of the present value of fully projected benefits attributable to service credit that has been earned (or accrued) as of the valuation date.

**Actuarial Present Value:** The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of actuarial assumptions (i.e. interest rate, rate of salary increases, mortality, etc.).

**Aggregate Funding Method:** The Aggregate Funding Method is a standard actuarial funding method. The annual cost of benefits under the Aggregate Method is equal to the normal cost. The method does not produce an unfunded liability. The normal cost is determined for the entire group rather than on an individual basis.

**Entry Age Normal Cost Method (EANC):** The EANC method is a standard actuarial funding method. The annual cost of benefits under EANC is comprised of two components:

- Normal cost.
- Amortization of the unfunded liability.

The normal cost is determined on an individual basis, from a member's age at plan entry, and is designed to be a level percentage of pay throughout a member's career.

**Normal Cost:** Computed differently under different funding methods, the normal cost generally represents the portion of the cost of projected benefits allocated to the current plan year.

**Projected Unit Credit (PUC) Liability:** The portion of the Actuarial Present Value of future benefits attributable to service credit that has been earned to date (past service).

**Projected Benefits**: Pension benefit amounts which are expected to be paid in the future taking into account such items as the effect of advancement in age as well as past and anticipated future compensation and service credits.

**Unfunded PUC Liability:** The excess, if any, of the Present Value of Benefits calculated under the PUC cost method over the Valuation Assets. This is the portion of all benefits earned to date that are not covered by plan assets.

**Unfunded Actuarial Accrued Liability (UAAL):** The excess, if any, of the actuarial accrued liability over the actuarial value of assets. In other words, the present value of benefits earned to date that are not covered by plan assets.

## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

This bill allows the Average Final Compensation (AFC) for members of the Public Employees' Retirement Systems (PERS) to include compensation lost due to the result of reduced hours, voluntary leave without pay or temporary furloughs during the 2009-11 biennium if the reduced compensation was an integral part of the employer's expenditure reduction efforts.

This change does not have a fiscal impact on the Department of Retirement Systems (DRS) because review/confirmation of the AFC is a normal step in processing a member's retirement. DRS assumes that employers will report the actual (reduced) compensation received by the member, and member and employer contributions will be based on that compensation.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

No impact.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

# **ACTUARY'S FISCAL NOTE**

RESPONDING AGENCY:	CODE:	DATE:	BILL NUMBER:
Office of the State Actuary	035	2/10/10	6503 SSB AMH WAYS PRIN 211

#### WHAT THE READER SHOULD KNOW

The Office of the State Actuary ("we") prepared this fiscal note based on our understanding of the bill as of the date shown above. We intend this fiscal note to be used by the Legislature during the 2010 Legislative Session only.

We advise readers of this fiscal note to seek professional guidance as to its content and interpretation, and not to rely upon this communication without such guidance. Please read the analysis shown in this fiscal note as a whole. Distribution of, or reliance on, only parts of this fiscal note could result in its misuse, and may mislead others.

#### SUMMARY OF RESULTS

This bill requires reductions in employee compensation costs for all state agencies (establishes a statewide "furlough policy") and grants new retirement benefits for members of the Teachers' Retirement System (TRS), Public Safety Employees' Retirement System (PSERS), Law Enforcement Officers' and Fire Fighters' Retirement System (LEOFF), and Washington State Patrol Retirement System (WSPRS) who may be impacted by furloughs.

The new retirement benefits do not have a material cost to the affected retirement systems. The statewide furlough policy may change furlough experience in the Public Employees' Retirement System (PERS) from what we assumed under current law. However, we do not expect this experience change to produce a cost to PERS beyond what we already assume for current law. Please see the body of this fiscal note for more details.

#### WHAT IS THE PROPOSED CHANGE?

## **Summary Of Change**

This bill impacts the following systems:

- **PERS.**
- **TRS.**
- **PSERS.**
- **\Lequip** LEOFF.
- **❖** WSPRS.

This bill requires all state legislative, executive, and judicial agencies, as well as institutions of higher education to reduce employee compensation costs by their proportionate share of \$50 million by the end of state Fiscal Year 2011. Each agency's proportionate share will be adjusted to reflect furloughs implemented between July 1, 2009, and January 1, 2010. No adjustments will be made for reductions adopted as a result of the 2009 operating budget (ESHB 1244 and Chapter 564, Laws 2009).

The Office of Financial Management must work with agencies to proportionately reduce compensation for Washington Management Services and Exempt Management Services employees by \$750,000 in Fiscal Year 2010, and \$9.25 million in Fiscal Year 2011.

By May 15, 2010, each agency and institution may submit a cost reduction plan that may include, for example, temporary layoffs and reductions in workforce. Agencies that do not file a plan will be required to close the agency and temporarily lay off the workers on eleven business days: one per month, from June 2010 until the end of the current biennium. Employees who are not scheduled to work on one of these days must receive a temporary layoff on an alternative date.

Numerous exemptions are established, for example where necessary to maintain public health and safety.

When calculating average salary, the Department of Retirement Systems must include any compensation forgone during the 2009-11 Biennium due to reduced work hours, voluntary leave without pay, or temporary furloughs. In lay terms, this means the member's salary average will reflect what the member would have earned had it not been for the furlough. Members of PERS received protection from this reduction under previous legislation (SB 6157, and Chapter 430, Laws of 2009). This bill also extends the protection to employees of state agencies or institutions who are members of TRS, PSERS, LEOFF, and WSPRS.

The protection for salary average only applies to reduced work hours, voluntary leave without pay, or temporary furloughs taken during the 2009-11 Biennium that are declared by the employer to be an integral part of an employer's expenditure reduction efforts. This bill makes that declaration.

Further changes to this amendment (as reflected in SSB 6503 AMH Ways H4985.1) are technical corrections that do not impact the pension systems or the results of this fiscal note.

Effective Date: Immediately upon passage.

# What Is The Current Situation?

Due to budget concerns, some agencies have implemented cost reduction measures including furloughs. In 2009 the Legislature passed SB 6157 (explained above) to mitigate the impact of furloughs on retirement benefits for members of PERS.

Members of the other state retirement systems do not have provisions to mitigate the impact of furloughs on their retirement benefits.

# Who Is Impacted And How?

We estimate this bill could affect any of the active members in TRS, PSERS, LEOFF, and WSPRS employed in state agencies through improved benefits. The table below shows the total count of active state-employed members by system and plan.

System	Plan 1	Plan 2/3	Total
PERS	5,778	82,211	87,989
TRS	236	175	411
PSERS	N/A	2,249	2,249
LEOFF	0	223	223
WSPRS	851	234	1,085

As an example, this bill could increase the benefits for a member of TRS affected by state furloughs through an increase in the Average Final Compensation (AFC) that would have been forgone under current law.

The bill also establishes a statewide furlough policy which may produce furlough experience in PERS that differs from our current assumption. Any material difference would likely emerge as an experience gain/loss and impact PERS 2 member rates and PERS employers rates beyond the current biennium.

# WHY THIS BILL DOES NOT HAVE AN ADDITIONAL COST AND WHO PAYS FOR IT

#### Why This Bill Does Not Have An Additional Cost

The statewide furlough policy may change furlough experience in PERS from what we assumed under current law. However, we do not expect this experience change to produce a cost to PERS beyond what we already assume for current law. For last year's legislation, SB 6157, we determined a supplemental contribution rate increase of 0.01 percent each for the PERS 1 Unfunded Actuarial Accrued Liability (UAAL) contribution rate and the PERS 2/3 Normal Cost (NC) rate. These supplemental rate

increases correspond to approximately 12 percent of all PERS members taking ten furlough days per year in the 2009-11 Biennium. We assume these supplemental contributions will cover any additional costs from this bill.

We further expect that the benefit improvements for affected members in TRS, PSERS, LEOFF, and WSPRS, systems not covered under current law, will not have a material impact on the costs of those systems due to the limited number of eligible and non-exempt members in those systems.

Please see Appendix A for more details.

# Who Will Pay For These Costs?

A cost could arise from this bill if the actual number of state furlough days exceeds the number we assumed. Should this occur, the cost would emerge over time as an experience loss and would be divided between members, local employers, and the state according to the standard funding methods:

- ❖ Plan 1 and Plan 3: 100 percent employer.
- ❖ Plan 2, WSPRS: 50 percent member and 50 percent employer.
- ❖ LEOFF 2: 50 percent member, 30 percent employer, and 20 percent State.

The analysis of this bill does not consider any other proposed changes to the systems. The combined effect of several changes to the systems could exceed the sum of each proposed change considered individually.

As with the costs developed in the actuarial valuation, the emerging costs of the systems will vary from those presented in the June 30, 2008, Actuarial Valuation Report (AVR) or this fiscal note to the extent that actual experience differs from the actuarial assumptions.

#### HOW THE RESULTS CHANGE WHEN THE ASSUMPTIONS CHANGE

To determine the sensitivity of the actuarial results to the best-estimate assumptions selected for this pricing we varied the following assumption:

❖ The percentage of PERS members taking ten furlough days per year during the current biennium. (The assumption for pricing SB 6157 from last year − now current law.)

For purposes of this sensitivity analysis only, we increased our current assumption of 12 percent in PERS to 36 percent in PERS 1 and 22.5 percent in PERS 2/3. Under these assumptions, we would expect an additional 0.01 percent UAAL and NC contribution rate beginning in the 2011-13 Biennium. We estimate a 2011-13 budget impact from this bill of \$0.9 million from the General Fund and \$4.2 million from all employers. Over 25

years, we estimate a budget impact from this bill of \$6.2 million from the General Fund and \$27.6 million from all employers.

Otherwise, we developed the estimated costs for this sensitivity analysis using the same data, assumptions, and methods as disclosed in the AVR.

#### **ACTUARY'S CERTIFICATION**

The undersigned hereby certifies that:

- 1. The actuarial cost methods are appropriate for the purposes of this pricing exercise.
- 2. The actuarial assumptions used are appropriate for the purposes of this pricing exercise.
- 3. The data on which this fiscal note is based are sufficient and reliable for the purposes of this pricing exercise.
- 4. Use of another set of methods and assumptions may also be reasonable, and might produce different results.

#### APPENDIX A – PRICING DETAILS

#### **Assumptions We Made**

We assumed at least \$20 million of the \$60 million compensation savings required under this bill come from sources other than furloughs (or about 33 percent).

#### Why There Is No Additional Cost to PERS

In our pricing for SB 6157 during the 2009 Session, we determined a supplemental contribution rate increase of 0.01 percent each for the PERS 1 UAAL contribution rate and the PERS 2/3 NC rate. These supplemental rate increases correspond to approximately 12 percent of all PERS members taking ten furlough days per year in the 2009-11 Biennium. We found that this was equivalent to a \$99 million salary savings over all of PERS.

For PERS, this bill impacts state-employed members only – about 55 percent of PERS. So, we must reduce the salary savings to \$54 million (= \$99 million x 55 percent).

Therefore, if at least \$6 million (= \$60 million minus \$54 million) of the compensation savings required under this bill come from sources other than furloughs (or about 10 percent), then we will not see costs beyond what we already assume under current law.

# Why The Cost To Other Systems Is Immaterial

This bill also extends protection against reductions in members' AFC to state-employed members of systems other than PERS. We do not believe additional costs that result from that protection would be material for those systems because they have relatively few state employees who would be impacted by these furloughs.

The bill contains many exemptions for, among others, law enforcement and corrections officials, firefighters, and some higher education employees. The next table shows each of these systems' total count of active members, count of those actives who are state employees, and the number of state employees we believe would be eligible (non-exempt) for furlough reductions.

System	All Actives	State Actives	Non-Exempt
TRS	66,524	411	411*
PSERS	3,981	2,249	0
LEOFF	17,047	223	0
WSPRS	1,085	1,085	0

<sup>\*</sup>About 70% of these members work for higher education employers and could be exempt.

Otherwise, we developed these costs using the same data, assumptions, and methods as disclosed in the AVR.

#### **GLOSSARY OF ACTUARIAL TERMS**

**Actuarial Accrued Liability:** Computed differently under different funding methods, the actuarial accrued liability generally represents the portion of the present value of fully projected benefits attributable to service credit that has been earned (or accrued) as of the valuation date.

**Actuarial Present Value:** The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of actuarial assumptions (i.e. interest rate, rate of salary increases, mortality, etc.).

**Aggregate Funding Method:** The Aggregate Funding Method is a standard actuarial funding method. The annual cost of benefits under the Aggregate Method is equal to the normal cost. The method does not produce an unfunded liability. The normal cost is determined for the entire group rather than on an individual basis.

**Entry Age Normal Cost Method (EANC):** The EANC method is a standard actuarial funding method. The annual cost of benefits under EANC is comprised of two components:

- ❖ Normal cost.
- ❖ Amortization of the unfunded liability.

The normal cost is determined on an individual basis, from a member's age at plan entry, and is designed to be a level percentage of pay throughout a member's career.

**Normal Cost:** Computed differently under different funding methods, the normal cost generally represents the portion of the cost of projected benefits allocated to the current plan year.

**Projected Unit Credit (PUC) Liability:** The portion of the Actuarial Present Value of future benefits attributable to service credit that has been earned to date (past service).

**Projected Benefits**: Pension benefit amounts that are expected to be paid in the future taking into account such items as the effect of advancement in age as well as past and anticipated future compensation and service credits.

**Unfunded PUC Liability:** The excess, if any, of the Present Value of Benefits calculated under the PUC cost method over the Valuation Assets. This is the portion of all benefits earned to date that are not covered by plan assets.

**Unfunded Actuarial Accrued Liability (UAAL):** The excess, if any, of the actuarial accrued liability over the actuarial value of assets. In other words, the present value of benefits earned to date that are not covered by plan assets.

# **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

Section 1 of the striking amendment directs agencies to achieve a reduction in government operating expenses approximately equal to \$50 million from General Fund - State and Education Legacy Trust Account expenditures, and additional proportional amounts from other funds and accounts during the 2009-11 Biennium, through the methods described in the amendment.

Executive branch agencies (other than higher education institutions) may submit to the Office of Financial Management a compensation reduction plan to achieve the cost savings that would result from 11 days of temporary layoff. Higher education institutions may submit similar compensation reduction plans, but the state board of technical and community colleges shall submit a single plan for all community and technical colleges. If agencies do not supply an approved plan, the agencies would be closed on one day in Fiscal Year 2010 and on ten specified days in Fiscal Year 2011. The closures are to result in the temporary layoff of employees, and employee compensation is to be reduced proportionately. The layoffs are not to affect vacation leave accrual, seniority, health insurance, or sick leave credits. The compensation reduction is deemed to be an integral part of "expediture reduction efforts" under chapter 430, Laws of 2009, which means that the calculation of pension benefits is held harmless, in spite of an employee's reduced work hours. Certain activities are exempted from the closures. The provisions would take effect immediately, with the first closure occuring on Monday, June 14, 2010. This fiscal note estimates the impact of these closures and of the expenditure reductions included in Section 9. Based on the assumptions contained in the attachment, 11 days of closure would save \$39.97 million General Fund-State, and \$28.85 million in Other Funds.

Section 9 directs a reduction of compensation expenditures for Washington Management Service (WMS) and exempt management services. The reduction would be \$750,000 in Fy 2010 and \$9.4 million in FY 2011, from the General Fund-State. Proportional reductions would be taken in other funds.

Thes estimates are based on the most recently enacted budget. Additional reductions that have been proposed in the Governor's 2010 Supplemental Budget, or that may be enacted by the Legislature, would affect the savings that could be achieved by closing state agencies. If significant budget reductions are made in the 2010 Supplemental Budget, the cost savings from temporary layoffs would be less than estimated in this fiscal note.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

This striking amendment exempts the major state revenue-collection functions at Department of Revenue, Liquor Control Board, State Lottery, and Child Support collections at the Department of Social and Health Services from closure. However, there are many other revenue collection functions at various agencies that could be affected by the closure, but the estimated revenue loss cannot be calculated.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

Please see attachment for expenditure assumptions.

# **Description of Estimate**

These estimates are based on the following assumptions:

- 1. In Section 2 (2) of the bill, we have interpreted "compensation" to mean salary and wages, along with related employer pension and social security and Medicare contributions, assuming no effect on insurance or other benefits not specified in this sub-section;
- The estimate assumes that the temporary layoffs are possible under collective bargaining agreements;
- 3. The estimate does not include any administrative or other implementation costs;
- 4. Any potential revenue lost is indeterminate at this time;
- 5. It is assumed that no employees would be eligible for unemployment benefits as a result of the layoffs;
- 6. We have also made a number of assumptions and interpretations about the definitions of activities that are exempted from closure, which are noted in the details below.

## **Exemptions**

The exemptions specified in Section 2 (4) of the bill were estimated as follows:

Sec.2(4)	Exemption	Notes
а	Direct custody, supervision and patient care in:	
a(i)	corrections;	Prisons and Community Corrections exempted.
a(ii)	juvenile rehabilitation;	DSHS Juvenile Rehabilitation program exempted.

a(iv)	state hospitals, the university of Washington medical center and harborview medical center;	DSHS Mental Health program and UW funds exempted.
a(v)	the special commitment center, and	DSHS Special Commitment Center program exempted.
a(vi)	the school for the blind;	This agency exempted.

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

The Labor Relations Office (LRO) of the Office of Financial Management is currently in the process of planning for and commencing negotiations for the 2011-13 biennium. Any negotiations resulting from the implementation of this legislation will impact the workload significantly of LRO. SSB 6503 AMH WAYS PRIN 211 is unclear on the definition of "each local unit" {Section 3(1)(a)}. If LRO were to interpret this to mean each bargaining unit, that would be approximately 150 separate negotiations that would need to be conducted for general government. If "each local unit" is interpreted to mean each location within each bargaining unit, the 150 negotiations would increase exponentially. The workload for higher education could be up to 27 separate impact bargaining agreements for 23 community colleges, Central Washington University, Eastern Washington University, and The Evergreen State College.

LRO needs to be able to manage the workload associated with the impact bargaining associated with temporary layoffs while continuing the regular work associated with the implementation of the 2009-11 agreements and the bargaining for the 2011-13 agreements.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

It is unlikely that the LRO would be able to recruit the necessary positions in order to accomplish the increased workload, however we assume for costing purposes that the LRO is able to obtain qualified candidates. We anticipate negotiations related to this bill would commence on March 1, 2010.

## Other Assumptions:

- \*\*150 general government impact bargaining agreements resulting from our interpretation that "each local unit" to mean bargaining unit;
- \*\*Could be as many as 27 impact bargaining agreements for higher education;

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

This bill requires the closure of state offices one day per month on eleven dates specified by the bill effective June 2010 through June 2011. The office closure shall result in temporary layoff of the employees of the agency. The bill exempts employees engaged in activities that are specified in the bill. The temporary lay off reduces payment of the employee proportionate to the duration of the layoff but does not impact vacation or sick leave accrual or seniority. If the employee is not scheduled to work on a designated office closure date, the agency must designate an alternative day during the month on which the employee is scheduled to work that the employee is temporarily laid off.

If the office closure prevents the performance of any action, the action shall be considered timely if performed the next business day.

Amendment AMH Ways PRIN 211 – Section 9 – Adds Washington Management Services and Exempt Management Services additional cuts totaling \$10 million GF-S and other funds proportionately.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

Since DOP's costs are incurred in the Data Processing Revolving Account (Fund 419), they must be recovered through increased billings to agencies or from a single source outside DOP.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

This bill will impact the Human Resource Management System (HRMS) under the responsibility of the Department of Personnel (DOP) based on the following assumptions:

DOP/Information Services Division (ISD) would need to create a new Absence/Leave Type for the temporary layoff.

A new wage type would need to be created and configured according to the specifications in the bill, to capture the monetary value of the leave and to reflect the unpaid leave on the employee's earning statement.

DOP is assuming no HRMS automation. Agencies would use existing functionality to enter the absence type each month for affected employees.

Based on a conversation with the Office of Financial Management, DOP is assuming that any office closure dates specified in this bill would not affect state pay dates that fall on the same date (i.e. April 9, 2010 and June 10, 2011 are pay dates).

DOP is assuming that there is no impact on retirement credits.

DOP is assuming that there is no impact on holiday pay calculations for part time employees.

DOP assumes any WMS or EMS employees furloughed additional days as a result of implementing Section 9 would use the same new Absence/Leave Type and Wage type. Therefore, DOP assumes the amendment results in no change to DOP's fiscal impact.

## **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

This bill requires state agencies and higher education employers to achieve a reduction in employee compensation for the 2009-11 Biennium. Agencies may do this one of two ways: 1) present a compensation reduction plan to the Office of Financial Management no later than May 15, 2010; or 2) adhere to the proposed closure dates outlined in the bill.

Current law requires the Department of Retirement Systems (DRS) to modify the definition of Average Final Compensation (AFC) for the Public Employees' Retirement System (PERS) to include the salary forgone by members due to taking time off without pay during the 2009-11 Biennium. This modification only applies to time off taken as an integral part of an employer's effort to reduce expenditures. Section 2(5) of this bill states that these measures qualify as an integral part of an employer's expenditure reduction efforts, and retirement benefits will not be lost due to these measures.

Sections 5 through 8 of the proposed striking amendment modify the definition of AFC in the same manner for four other retirement systems: the Law Enforcement Officers' and Fire Fighters' (LEOFF) Retirement System, the Teachers' Retirement System (TRS), the Public Safety Employees' Retirement System (PSERS) and the Washington State Patrol Retirement System (WSPRS).

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

No impact.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

The Department has identified that an additional 30 minutes per retirement calculation is required for any retiree with furlough days in their AFC. This additional 30 minutes is needed to contact the employer to determine the amount and timing of missing salary due to the employee furlough, and to adjust the retirement benefit accordingly. Approximately 5,000 PERS members retire each year, but it is unclear how many will have been furloughed during their AFC period, however, we don't anticipate the additional effort required to calculate the benefits will exceed \$50,000 per year. Although the striking amendment brings four other retirement systems into this process, since many of the members are exempted in Section 2(4) and since K-12 is not included in the reductions, the impact on operations is not sufficient to change our estimate of indeterminate but less than \$50,000 per year.

# **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

AMH WAYS SSB 6503 requires each state agency to create state general fund (plus tuition) savings by measures that may include but are not limited to reduced compensation, leave without pay, workforce reductions, reduced work hours, as well as voluntary retirement, separation and other incentive programs. Each agency's savings plan would be due to OFM by May 15, 2010. OFM's director would be required to review, approve and submit each plan by June 1, 2010. If a plan is not submitted and approved, the agency or institution would be required to close on the identified dates of the bill. Certain activities within state agencies are exempt from this bill.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

The fiscal impact of AMH WAYS SSB 6503 is indeterminate for the University of Washington. The UW cannot identify the fiscal impacts of SSB 6503 without knowing what the institution's overall savings target would be. Below is a narrative describing the kinds of administrative and bargaining costs the UW anticipates in relation to planning and implementing this bill. For the purposes of this narrative, the UW assumes that OFM approves a plan that does not include furloughs.

The UW would create a plan for compensation savings with the following process. First, the amount of savings needs to be identified by OFM. The Office of Planning and Budgeting, in conjunction with Academic Human Resources and staff Human Resources, would analyze these numbers to provide scenarios for the Provost, President, and Vice Provosts/Deans to consider. The likely outcome would translate to an average of an x% cut to each unit. The applicable percentage reduction target would be given to each organization's leader for that organization to develop its implementation plan. The implementation plan from each organization would then be returned to the Office of Planning and Budgeting for further discussions with leadership, analysis and review. Ultimately, a plan encompassing all UW units would be developed for OFM's review. The process does not differentiate between employee classifications. Without knowing the total UW savings target, it is not possible to develop meaningful estimates of the cost associated with developing the savings plan.

However, we can report that in order to implement any required savings two parallel processes would be required-- one in Academic Human Resources and one in UW Human Resources.

Academic Human Resources would be required to identify, by working with each academic unit, which employees are subject to the bill and approved UW plan. This would require IT staff to identify any academic employee who receives pay from tuition or state general fund dollars. Qualifying academic personnel would need to be tracked in a separate and

Request # 2010-43-2

new manner. The time it will take to identify, report and track this process within the academic human resources database system is anticipated to require .2 FTE of IT staff effort, or approximately \$20,800 of salary costs. In addition, we estimate that reviewing processes and regulations to ensure that the compensation savings has minimal impact on the academic mission of the UW would require .1 FTE business analyst efforts, or an additional \$12,933.

Additionally, it would take approximately a 0.6 FTE effort of HR Specialists, or \$48,000 salary costs to work with the units and the employees impacted (e.g. notices, paperwork, separation requirements, etc.). Lastly, any process such as this takes careful analysis and work on the part of the Academic Personnel leadership to ensure that the process and implementation runs as smoothly as possible is communicated correctly, and that any impacts are reviewed within the context of the UW mission. An average of .3 FTE effort of leadership staff time is estimated to cost \$65,333.

Ultimately, the fiscal impact for central academic human resources would be approximately \$147,000 not including benefits or materials. The costs of implementation at the local level are indeterminate at this time.

UW Human Resources would handle implementation of the plan for non-academic UW personnel. Again, without knowing what the target savings amount for the UW would be, it is impossible to fully quantify how large scale an effort would ensue. However, for sense of scale and scope, for any given classified staff member affected by this bill approximately 5 hours of HR professional work is required as well as additional support staff effort and materials to prepare notices and identify options. We estimate that for every classified staff member affected it will cost the UW approximately \$210.00, including client consulting and client consulting and planning time.

For any given exempt Professional Staff member affected by this bill approximately 4.5 hours of HR professional work is required as well as additional support staff effort and materials to prepare correspondence and other notifications. We estimate that for every professional staff member affected it will cost the UW approximately \$175.00.

Additionally, UW Human Resources estimates at least \$7,500 in systems support costs over at least 3 months.

UW Human Resources also handles collective bargaining for the UW. It is anticipated that there would be a collective bargaining obligation over decision making about the plan and the implementation. The UW assumes it would take an estimated 8 weeks of bargaining, approximately 2 hours a week for 8 staff and 8 management for a fiscal impact of approximately \$10,000.

The bill does not specifically mention the effect of temporary salary reductions on other types of retirement contributions. As such, the UW assumes that employees impacted by this bill will also receive reduced retirement contributions if they are not part of the Public Employees Retirement System.

Since the UW does not know how many staff will be impacted it is not possible to calculate the total fiscal impact of SSB 6503. However, challenges associated with current systems, the complex nature of our academic personnel appointments and the number (over 11,000) of UW staff members covered under collective bargaining agreements make efforts such as these costly.

# **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

Requires institutions of higher education to achieve a reduction in employee compensation costs; equal to at least the cost reductions that would be achieved by implementing sections 2(2) through 2(8) of the bill. Institutions may submit a compensation reduction plan to the office of financial management (OFM) by May 15, 2010. OFM will provide target reductions for each institution and will review, approve, and submit the plans to legislative fiscal committees. Institutions that do not have an approved compensation reduction plan by June 1, 2010 must close on specified dates.

In addition to the compensation reduction plan or closure savings, Washington Management Services and Exempt employee compensation will be reduced by \$10 million General Fund-State, plus proportionate amounts from other funds.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

The lead agency assumptions request that WSU only address their administrative or collective bargaining expenses in the fiscal note.

Determining the nature of reductions that will be carried out will likely occur concurrently with other strategic budget cuts anticipated in the 2010 supplemental budget. WSU would seek cost effective methods to achieve the required cuts. If renegotiation of collective bargaining agreements is necessary we estimate a minimum cost of \$25,000. Other administrative costs would include system modifications, staff time, and training depending upon what method of achieving reductions is adopted. Until we have determined how the reductions will be accomplished, and the magnitude in terms of dollars and numbers of employees' affected, administrative costs are indeterminate.

# **Part II: Narrative Explanation**

#### II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Briefly describe by section number, the significant provisions of the bill, and any related workload or policy assumptions, that have revenue or expenditure impact on the responding agency.

It is hard to determine the cost to implement. A very rough guess would be \$10,000 as we will be paying for the negotiator we use and contract with to handle the discussion plus internal staff time.

#### II. B - Cash receipts Impact

Briefly describe and quantify the cash receipts impact of the legislation on the responding agency, identifying the cash receipts provisions by section number and when appropriate the detail of the revenue sources. Briefly describe the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explain how workload assumptions translate into estimates. Distinguish between one time and ongoing functions.

#### II. C - Expenditures

Briefly describe the agency expenditures necessary to implement this legislation (or savings resulting from this legislation), identifying by section number the provisions of the legislation that result in the expenditures (or savings). Briefly describe the factual basis of the assumptions and the method by which the expenditure impact is derived. Explain how workload assumptions translate into cost estimates. Distinguish between one time and ongoing functions.

The personal service contract is for a negotiator. All other costs will be absorbed by existing personnel.
