

NEGATIVE COLA

LEOFF Plan 2 Retirement Board

August 24, 2011

ISSUE

- Negative inflation or deflation could cause retiree's pension benefits to decline.

CURRENT PRACTICE

- Retirees entitled to a COLA on July 1 each year provided they have been retired one year
- COLA based on change, up or down in CPI-W for Seattle/Tacoma/Bremerton
- Benefit cannot fall below original calculated amount

HISTORICAL INFLATION DATA

YEAR	CPI-W, Seattle, Tacoma, Bremerton
2010	0.78%
2009	0.44%
2008	4.48%
2007	3.79%
2006	3.73%
2005	3.02%
2004	1.57%
2003	1.41%
2002	1.81%
2001	3.55%

EXAMPLE OF NEGATIVE COLA

- Member retired 7/1/2009 with a \$5000 monthly benefit.

Calendar Year	Monthly Benefit	Change in CPI-W	COLA (%)	COLA (\$)	Benefit after COLA
2010	\$5000.00	0.78%	0.78%	\$39.00	\$5039.00
2011	\$5039.00	(1.00%)	(1.00%)	(\$50.39)	\$5000.00*

- *Benefit can not fall below original benefit

EXAMPLE OF NEGATIVE COLA

- Member retired 7/1/2007 with a \$5000 monthly benefit.

Calendar Year	Monthly Benefit	Change in CPI-W	COLA (%)	COLA (\$)	Benefit after COLA
2008	\$5000.00	4.48%	3.00%	\$150.00	\$5150.00
2009	\$5150.00	0.44%	1.89%*	\$97.34	\$5247.34
2010	\$5247.34	0.78%	0.78%	\$40.93	\$5288.27
2011	\$5288.27	(1.00%)	(1.00%)	(\$52.88)	\$5235.39

- *COLA is greater than change due to “banking”

POLICY OPTIONS

- Introduce legislation to mitigate deflation
 - If deflation occurs, leave member's benefit at current level and then offset against future year's expected positive COLA
- Make no changes

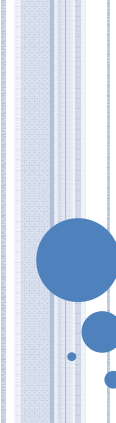

NEXT STEPS

- Defer to future date
- Select an option and bring it back for final proposal
- Gather additional information

QUESTIONS?

LAW ENFORCEMENT OFFICERS' AND FIRE FIGHTERS' PLAN 2 RETIREMENT BOARD

Negative COLA Preliminary Report Follow-up

August 24, 2011

1. Issue

The potential exists for a retired member's monthly pension to be reduced if there is negative inflation (deflation).

2. Staff

Greg Deam, Senior Research and Policy Manager
(360)586-2325
greg.deam@leoff.wa.gov

3. Members Impacted

As of June 30, 2009 there were 16,951 active members and 1,367 retirees as reported in the Office of the State Actuary's *2009 Actuarial Valuation Report*.

4. Current Situation

Under the current law, a retired member is entitled to an annual cost of living adjustment (COLA) effective July 1, after they have been retired for one year.

5. Background Information and Policy Issues

Background Information

One of the key features with all of the plan 2 retirement plans is a guaranteed COLA. The COLA is indexed to changes in the consumer price index for Urban Wage Earners and Clerical Workers (CPI-W) in the Seattle, Tacoma and Bremerton area. The COLA is limited to the lesser of the change in the index or three percent.

What would happen if a retiree encounters a time of negative inflation or deflation? The following examples show the impact to a retiree's pension benefit if in the 2011 calendar year there had been a change in the CPI-W of negative 1.00 percent.

Example 1: Member A retired 7/1/2009 with a \$5000.00 monthly pension benefit

Calendar Year	Monthly Benefit	Change in CPI-W	COLA	COLA (in dollars)	Benefit after COLA
2010	\$5000.00	0.78%	0.78%	\$39.00	\$5039.00
2011	\$5039.00	(1.00%)	(1.00%)	(\$50.39)	\$5000.00 ¹

¹The retiree's benefit cannot ever go below the original amount.

Example 2: Member B retired 7/1/2007 with a \$5000 monthly pension benefit.

Calendar Year	Monthly Benefit	Change in CPI-W	COLA	COLA (in dollars)	Benefit after COLA
2008	\$5000.00	4.48%	3.00%	\$150.00	\$5150.00
2009	\$5150.00	0.44%	1.89% ²	\$97.34	\$5247.34
2010	\$5247.34	0.78%	0.78%	\$40.93	\$5288.27
2011	\$5288.27	(1.00%)	(1.00%)	(\$52.88)	\$5235.39

²Due to "banking" the retiree's COLA was greater than the rate of inflation.

A key feature of the COLA is what is known as "banking". If the rate of inflation is greater than three percent, the amount over three percent is carried forward to the next year or "banked". "Banked" amounts are used to increase the member's COLA when inflation is less than three percent.

The amount a retiree has in their "bank" is dependent upon when they retire. In the example above, member B had some COLA "banked" because the 2008 change in CPI-W was greater than three percent so they were able to receive a COLA in 2009 that exceeded the change in the CPI-W.

Since the beginning of LEOFF Plan 2 in October of 1977 there has been only one year in which the rate of inflation was negative and that was in 1983. The percentage change for that

year was negative 0.27%. However, since the preceding year was 6.48% there was no negative impact to any LEOFF Plan 2 retiree's pension benefit amount due to banking.

There have been situations in Washington State and other states where negative inflation had a negative effect on a retiree's pension benefit.

- In LEOFF Plan 1 the retiree's pension is adjusted according to the index without limitations up or down, but there is no "banking" provision. LEOFF Plan 1 pension benefits are adjusted for the Consumer Price Index – Seattle, Washington area for urban wage earners and clerical workers, all items (1957 – 1959 = 100) compiled by the Bureau of Labor Statistics, United States Department of Labor. In 1983 when the change in the Consumer Price Index was negative 0.27 percent, LEOFF Plan 1 retirees received an actual decrease in their pensions in April of 1984.
- In the Maryland Retirement and Pension System retirees were scheduled to have a negative COLA applied to their benefits in July 2010. However, legislation was passed that will keep their pensions at the current level and will instead deduct the negative inflation from the positive COLA expected in the following year.

Policy Issues

Under current law there is no annual limit on how much a member's benefit can be reduced under negative inflation, other than the limitation of not falling below the original calculated pension benefit amount. Although the "banking" feature of the plan 2 COLA may help mitigate the impact of negative inflation it does not eliminate the risk of a negative COLA.

6. Policy Options

Option 1: Leave member benefit unchanged and offset deflation against future inflation

Under this option a negative COLA would be deducted from future year's expected positive COLA instead of reducing a member's benefit in the current year. This means a member's benefit would never go down as a result of negative inflation.

Option 2: Take No Action

Under this option the member's benefit could go down, but would never go below the original benefit amount.

7. Supporting Information

Historical Annual Inflation Data¹

Year	CPI-W STB	Year	CPI-W STB	Year	CPI-W STB	Year	CPI-W STB
2010	0.78%	2001	3.55%	1992	3.54%	1983	-0.27%
2009	0.44%	2000	3.75%	1991	5.53%	1982	6.48%

RCW 41.26.440 Post-retirement cost-of-living (LEOFF Plan 2).

Beginning July 1, 1979, and every year thereafter, the department shall determine the following information for each retired member or beneficiary whose retirement allowance has been in effect for at least one year:

- (1) The original dollar amount of the retirement allowance;
- (2) The index for the calendar year prior to the effective date of the retirement allowance, to be known as "index A";
- (3) The index for the calendar year prior to the date of determination, to be known as "index B"; and
- (4) The ratio obtained when index B is divided by index A.

The value of the ratio obtained shall be the annual adjustment to the original retirement allowance and shall be applied beginning with the July payment. In no event, however, shall the annual adjustment:

- (a) Produce a retirement allowance which is lower than the original retirement allowance;
- (b) Exceed three percent in the initial annual adjustment; or
- (c) Differ from the previous year's annual adjustment by more than three percent.

For the purposes of this section, "index" means, for any calendar year, that year's average consumer price index -- Seattle, Washington area for urban wage earners and clerical workers, all items, compiled by the bureau of labor statistics, United States department of labor.

WAC 415-02-350 What are cost-of-living adjustments and how are they calculated?

(1) **What is a cost-of-living adjustment (COLA)?** The value of a retiree's, beneficiary's, or ex-spouse's monthly allowance may change in the years after retirement because of inflation or other factors. A COLA automatically adjusts benefits based on the cost of living changes.

(2) **What retirement plans include COLAs?** With one exception, all retirement plans administered by the department provide one or more of the types of COLAs listed in subsection (3) of this section. The judges retirement fund (chapter [2.12](#) RCW) does not provide a COLA.

RETIREMENT SYSTEM	PLAN	COLA TYPE	STATUTE
JUDICIAL		Base	RCW 2.10.170
LEOFF	Plan 1	Base	RCW 41.26.240
LEOFF	Plan 2	Base	RCW 41.26.440
PSERS		Base	RCW 41.37.160

TRS	Plan 1	Optional Auto	RCW 41.32.530 (1)(d)
TRS	Plan 2	Base	RCW

			41.32.770
TRS	Plan 3	Base	RCW 41.32.845
WSPRS	Plans 1 and 2	Base	RCW 43.43.260

(3) What are the types of COLAs?

(a) Auto COLA

The auto COLA, if offered under your plan, is an option you may select at retirement. If you choose this option, your monthly retirement allowance will be actuarially reduced at retirement, and you will receive an automatic adjustment in your monthly retirement allowance each year for the rest of your life. The auto COLA has no age requirement and is limited to a maximum of three percent of your monthly allowance.

(b) Base COLA

The base COLA is applied in July (April for LEOFF Plan 1) of each year and adjusts the benefit based on the change in the Consumer Price Index for the Seattle-Tacoma-Bremerton, Washington area. Base COLAs are limited to a maximum of three percent of the monthly allowance for all affected plans except LEOFF Plan 1. During a calendar year, the base COLA is payable to:

(i) Retirees who have been retired for at least one year by July 1st of each year (April 1st for LEOFF Plan 1); and

(ii) Beneficiaries or eligible ex-spouses who receive benefit payments from an account that, by July 1st, has paid a monthly benefit for at least one year (April 1st for LEOFF Plan 1).

(c) Uniform COLA

The uniform COLA is an annual adjustment to the benefit, based on years of service. The annual adjustment for the uniform COLA is independent from any other COLA. During a calendar year, it is payable to:

(i) Retirees who, by July 1st, have received a retirement benefit for at least one year and who, by December 31st, will have reached age sixty-six or older;

(ii) Beneficiaries and eligible ex-spouses who receive benefit payments from an account that, by July 1st, has paid a monthly benefit for at least one year and who, by December 31st, will have reached age sixty-six or older; and

(iii) Retirees, beneficiaries, or eligible ex-spouses of any age whose retirement benefit is calculated under the minimum formula.

(4) Who is responsible for determining the amount of the COLA? The office of the state actuary (OSA) bases the percentages of the COLAs on the Consumer Price Index. The Index is based on wages earned by urban wage earners and clerical workers in the Seattle-Tacoma-Bremerton, Washington area. OSA provides this information to the department annually.
